Acidophils and growth hormone concentration, 1053
ACTH, in absence of vasopressin, 1058
action of, on steroidogenesis in chicken adrenal gland, 652
bio-assay for, 624
effects of, in ovariectomized monkeys, 745
N-acetylated, hyperglycemic action of, 635
release, and protein-bound corticosterone, 1040
and vasopressin, 328
Actinomycin D, effect on estrogen response in uteri of adrenalectomized rats, 1162
and thyroid, 424
Adenoma, pituitary, in a hedgehog, 842
Adenosine-3′,5′-monophosphate in canine liver, glycogenolytic effect of, 1065
ADH release, cerebral control of, 871
Adipose tissue, perirenal, response to antilipolytic action of insulin, 565
Adrenal cortex, in carbohydrate synthesis, 182
control of epinephrine synthesis in adrenal medulla by, 608
Adrenal glands, hyperplastic, biosynthesis of sexual steroids by, 681
Adrenal hormones and transamidinase, 1143
Adrenocortical activity in infantile rat, 631
Adrenocortical stimulation, insulin-induced, 737
Aldosterone, excretion of, by rats, 815
production of, and protein synthesis, 955
Alloxan effect on thyroid hormone secretion rate in rats, 828
Amino acid(s), accumulation by thyroid gland, 675
levels of, in rats with GH-producing tumors, 865
steroids and transport of, 531
thyroxine stimulation of incorporation into mitochondria of, 81
Androgen, intracerebral, and sex behavior, 783
Androgen sterilization, intracerebral, 1135
Androstane, synthetic, inhibition of corticosteroidogenesis by, 1123
Anions, effect on thyroidal iodine metabolism, 237
Antibiotics, inhibition of ovulation by, 858
Antiestrogen, activities of a potent steroidal, 125
Antiserum, specific, to LH, 362
Antithyroid action of natural compounds, 1117
Ascorbic acid role in testicular degeneration and adrenal hypertrophy in tyrosine-fed rats, 1157
ATP concentration, TSH effect on, 732
ATPase, ouabain-sensitive, I^- pump and, 801

Blood, exchange of thyroid hormones between liver and, 391
flow of anterior pituitary, in rats, 341
Brain, control of ADH release by, 871

Calcium, metabolism of, and thyrocalcitonin, 687
serum, endogenous thyrocalcitonin effect, 191
urinary, and chronic PTX, 77
Carbohydrate, metabolism of, effects of purified human placental protein on, 709
synthesis of, role of adrenal cortex in, 182
Castration effects on hypothalamic content of LRF, 432
Catecholamines and thyroidectomy, 554
CBG, endocrine control of, 67
role of AP hormones in control of, 55
Chlorpromazine, effect of coitus on inhibition of ovulation by, 1130
CN-55,945-27 effect on reproductive mechanisms, 153
Coitus and ovulation in the rat, 1130
Collagen(s), in estradiol-treated rats, 486
and hormones, 1047
Compounds, naturally occurring, antithyroid action of small doses of, 1117
Corpora lutea, functional, estrogen treatment to preserve, 1011
Cortex, adrenal, norethynodrel and, 1095
Corticoids, parenterally administered, bio-assay for antiphlogistic and thymolytic activities of, 463
Corticosteroids, binding of, in plasma, 884
levels of, effect of tolbutamide on, 207
Corticosteroidogenesis, inhibition of, 1123
Corticosterone, norethynodrel influence on, in adrenal glands, 1095
Corticotrophs after gonadectomy and thyroidectomy, 808
Corticotropin and related peptides, relationships between structure and biological activities of, 635
Cortisol metabolism and lymphocytolysis, 168
Cortisone, hyperinsulinemia induced by, 749
protein binding of, inhibition of ACTH release by, 1040
and thyroid protein metabolism, 1079
Cortisone acetate, lactation induced by 212
Cyanotrimethylandrostenolone, inhibition of adrenal corticosteroidogenesis by, 1123

Dehydroepiandrosterone metabolism, placental, 524
Dehydrogenase(s), α-glycerophosphate, thyroid hormone induction of, 1075
hepatic glutamic, in catabolic states, 997
11β-hydroxysteroid, of lung and testis, 935
Δ^5-3β-hydroxysteroid, in testicular cells, 406
ovarian, in estrous cycle, 316
response to thyroxine analogs of, 90
Deiodination during pancreatin digestion, 601
Diabetes, hepatic glutamic dehydrogenase in, 997
Diabetes insipidus, metabolic balance in rats with, 301
Diiodotyrosine, inhibition of thyroidal deiodination of, 505
5,5′-Diphenylhydantoin and L-T_4 metabolism, 106

Eggs, rabbit, transportation and development, 939
Electrolyte transport and vitamin D, 773
Endocrine control of CBG, 67
Endocrine system, interrelationships of pineal gland, superior cervical ganglia and photoperiod in regulation of, 1168

Endocrinology: Orphan and Cinderella Science (presidential address), 823
Enzymes, gluconeogenic, in rats with GH-producing tumors, 865
  patterns of, during estrous cycle, 316
Epinephrine, control of synthesis of, 608
  effects of, on insulin in dogs, 830
Esterases, testicular, 294
Estradiol, collagens in rats treated with, 486
  distribution, effect of steroid hormones, ovariectomy, estrogen, sex and immaturity on, 38
  effect of temperature on uterine weight response to, 466
  ethinyl, effects on rabbit eggs of oral administration of, 939
  17β-, release of LH by, 455
Estrogen(s), antagonist of, action on fertility, 153
  control of uterine carbohydrate metabolism by, 1069
  effect of actinomycin D on response, 1162
  formation of, by mammalian placentae, 875
  inhibition by pentobarbital of precocious ovulation induced by, 451
  LH-induced secretion of, 289
  pretreatment with, effect on estradiol distribution, 38
  synergisms and antagonisms of, 420
  and thyroid, 849
  treatment with, to preserve functional corpora lutea, 1011
Estrone, effect of temperature on uterine weight response to, 466
Estrous cycle, ovarian dehydrogenases in, 316

Fertility, action of estrogen antagonist on, 153
FFA mobilization, production of H^+ during, 1100
FSH, in hypophysectomized female rat, 991
  and LH release, postcoital, 49
  in orchiectomized or cryptorchid rats, 912
  ovine, effect of tannation on, 149
  ovulation induced in immature rat by, 445
  pituitary, ovarian follicular development and, in pregnant rat, 572
FSH-RF, bovine, purification of, 1087
Furanestrenone, antiestrogenic activity of, 125

GH, concentration of, and acidophils, 1053
  hepatic effects of tumors producing, 865
  plasma, radioimmunoassay of, in rats, 275
  releasing activity of, in hypothalamus, 448
  secretion of, vasopressin stimulation of, in rhesus monkey, 1016
  serologic relatedness of, 615
Gland(s), adrenal, ACTH action on steroidogenesis in, 652
  mammary, experimental growth of, 650
Glucagon, effect of, on insulin in dogs, 830
  excess, hepatic glutamic dehydrogenase following, 997
Glucocorticoids, effects of, on glucose metabolism, in rat adipose isolated cells, 541
  and thymus *in vitro*, 387
Glucose, effect of tolbutamide on, 207
  fall of blood, in insulin-induced adrenocortical stimulation, 737
  metabolism of, in the uterus, 1069
β-Glucuronidase, cat, unresponsiveness to sex hormone stimulation, 216
Glycogen, effect of "hypophysectomy" by surgical decapitation on, 1021
Gonadectomy, corticotrophs after, 808
Gonadotrophin(s), ^{32}P assay of, application of, 1159
  rat pituitary, 912

H^+ production during FFA mobilization, 1100
Hair, change in color of, induced by α-MSH, 1155
HCG, PMS-, luteal cells from immature rats treated with, 373
  radioimmunoassay for, 10
Hormones, anterior pituitary, effect on CBG, 55
  and collagen, 1047
  gonadal, effect on hypothalamic content of LRF, 432
  growth, serologic relatedness of, 615
  sex, unresponsiveness of cat β-glucuronidase to stimulation by, 216
  steroid, effect on estradiol distribution, 38
    transformations by endocrine organs from pregnant mammals, 875
HPL, lactation induced by, 212
  in mammary gland, role of, 175
  purification of, 187
Hypercalcemia, importance of thyroid gland in preventing, 655
  thyroid in, 1033
Hyperinsulinemia, cortisone-induced, 749
"Hypophysectomy" by surgical decapitation, effect on glycogen content of glycogen body, 1021
Hypothalamus, bovine, purification of FSH-RF from, 1087
  of primates, GH releasing activity in, 448

I^- pump and ouabain-sensitive ATPase, 801
^{131}I, release rate of, mechanism of suppression by iodide of, 757
ICSH in hypophysectomized female rat, 991
Immunization with LH, influence of, 477
Infection, thyroid function during, 511
Insulin, adrenocortical response to, rate of blood glucose fall as determinant in, 737
  antilipolytic action of, 565
  glucagon and epinephrine effects on, 830
  plasma, effect of tolbutamide on, 207
Iodide, excess, effect on TSH release, 138
  and suppression of ^{131}I release, 757
  and thyroid hormone synthesis, 667
  and thyroidal metabolism, 1
  transport of thyroidal, 795
Iodine, deficiency of, 309
  heterogeneity of thyroidal, 927
  metabolism of, effects of actinomycin D on, in rat thyroid, 424
  thyroidal, effect of anions on, 237
Iodine-125, double label experiment with technetium-99m and, 281

Kidney mitochondria, PTH status and, 1001

Lactation induced by HPL and cortisone acetate, 212
LATS effect on thyroidal metabolism, 949
Lesions, median eminence, metabolic balance in DI rats with, 301
LH, effects on G-6-PDH and 20α-OH-SDH of, 352
  effects of immunization with, 477

estrogen secretion induced by, 289
and FSH release, postcoital, 49
human, radioimmunoassay for, 10
NIH-, effects of X-irradiation on antibody formation to, 643
norethindrone blockade of release of, 411
in orchiectomized or cryptorchid rats, 912
pituitary, ovarian follicular development and, in pregnant rat, 572
plasma, progesterone increase of, 907
release of, by 17β-estradiol, 455
specific antiserum to, 362
Lipid metabolism, effects of purified human placental protein on, 709
Liver, canine, glycogenolytic effect of 3,5′-AMP in, 1065
exchange of thyroid hormones between blood and, 391
LRF, release and synthesis of, 432
Lung, 11β-hydroxysteroid dehydrogenase of, 935
Luteal cells from PMS-HCG treated rats, 373
Luteal regulation following parabiosis, 457
Luteolysis induced by prolactin in hypophysectomized rats, 268
Luteotropic complex in hamsters, 716
Lymphocytolysis and cortisol metabolism, 168
Lymphosarcoma, P1798, cortisol metabolism and lympholytic effect in, 168

Mammary gland, effect of neonatal administration of testosterone propionate on growth of, 443
role of HPL in development of, 175
Medroxyprogesterone acetate effects on rabbit eggs, 939
Melanocyte-stimulating activity in transplantable pituitary tumor, 97
Metabolism, radioiodine, radioautographic studies on site of, in rat thyroid lobes, 469
Methimazole prevention of deiodination during pancreatin digestion, 601
Mitochondria, thyroxine stimulation of amino acid incorporation into, 81
Monophosphate, adenosine-3′,5′-cyclic, stimulation of steroidogenesis by, 647
MSH, activity of, in pituitary glands after tranquilizing drugs, 1018
α-, change in hair color induced by, 1165
elevated levels of pituitary, 768

NADPH, effects on adrenal steroid metabolism, 971
oxidation of, inhibition of thyroidal deiodination of diiodotyrosine by compounds which enhance, 505
NIH-LH, X-irradiation effects on antibody formation to, 643
Norethindrone blockade of LH release, 411
Norethynodrel and adrenal cortex, 1095

Ovariectomy, ACTH effects in monkeys after, 745
effect of, on estradiol distribution, 38
Ovulation, and coitus in the rat, 1130
in hypophysectomized rat, ICSH and FSH required for, 991
induced by FSH in immature rat, 445
inhibition of, by antibiotics, 858
precocious, estrogen-induced, inhibition by pentobarbital, 451

Pancreatin digestion, methimazole prevention of deiodination during, 601
Parabiosis, luteal regulation following, 457
Parathyroid therapy in osteopetrotic mice, counteraction to, 836
Parathyroidectomy, chronic, urinary calcium response to, 77
PBI fractions, thyroid, 197
Pentobarbital, inhibition of estrogen-induced precocious ovulation by, 451
Perchlorate effect on thyroidal iodine metabolism, 237
Phosphatides of thyroid tissue, TSH action on, 591
Pituitary, anterior, vasomotor activity of vasopressin in, 341
Pituitary-adrenal activity, stalk lesion and, 547
Pituitary gland(s), MSH activity in, after tranquilizing drugs, 1018
and pituitary tumor axis, 1149
of testosterone-sterilized rats, gonadotrophin content of, 261
Placentae, mammalian, estrogen formation by, 875
PMS, luteal cells from immature rats treated with, 373
Pregnancy, maintenance by reserpine of, in absence of dietary protein, 460
ovarian follicular development and pituitary FSH and LH content in, 572
Presidential address (Endocrinology: Orphan and Cinderella Science), 823
Progesterone, effect of, on plasma LH level, 907
synergisms and antagonisms of, 420
Prolactin, luteolytic action of, in hypophysectomized rats, 268
and luteotropic complex in hamsters, 716
Protein, binding of corticosteroids in plasma by, 884
dietary, maintenance of pregnancy by reserpine in absence of, 460
metabolism of thyroid, effects of cortisone on, 1079
purified human placental, biological effects of, 692
effects on lipid and carbohydrate metabolism, 709
synthesis of, and aldosterone production, 955
thyroid function in female rats severely depleted of, 1023
Proteolysis in thyroid particles, 19
Pseudopregnancy, utero-ovarian relationships in, 119
vaginal-cervical vibration for induction of, 440
PTH status and kidney mitochondria, 1001
Pyridine nucleotides in thyroid gland, 732

Reserpine, maintenance of pregnancy by, in absence of dietary protein, 460
Respiration, thyroid mitochondrial, 28
RNA metabolism in rats with GH-producing tumors, 865

Selenocyanate, accumulation and metabolism, 795
Septicemia, pneumococcal, thyroid function during, 511
Serum protein-steroid hormone interactions, 541
Sex behavior, intracerebral androgen and, 783
Stalk, pituitary, pituitary-adrenal system in rats with lesions in, 547

Steroid(s), and amino acid transport, 531
conversion of, in immature rat testes, 579
metabolism of adrenal, effects of NADPH on, 971
sexual, biosynthesis of, 681
synthesis of, placental, 524
Steroid hormone-serum protein interactions, 541
Steroidogenesis, in adrenal gland, action of ACTH on, 652
stimulation by adenosine-3′,5′-cyclic monophosphate, 647
Stress, response of infantile rat to, 631

T_3 tissue, in iodine deficiency, 309
T_3*, from T_4*, by thyrotropic tumors, 43
T_4, analogs of, activity of injected and fed, 90
deiodination and TSH-blocking effect of, 248
metabolism of, malignant tumor and, 964
synthesis of, in iodine deficiency, 309
Tannation effect on ovine FSH, 149
TBG, thyroxine binding to, 493
TBPA, thyroxine binding to, 493
Technetium-99m in thyroid physiology, 281
Testicular cells, Δ^5-3β-hydroxysteroid dehydrogenase in, 406
Testis, 11β-hydroxysteroid dehydrogenase of, 935
immature, steroid conversion in, 579
nonspecific esterase activity in adult rat, 294
Testosterone, androgen sterilization produced by intracerebral implants of, 1135
Testosterone propionate, effect of neonatal administration of, on mammary gland growth, 443
on thyroid hormone secretion rate, 1009
gonadotrophin content of pituitary glands of rats sterilized with, 261
Thiocyanate effect on thyroidal iodine metabolism, 237
Thymus, glucocorticoids and, *in vitro*, 387
Thyrocalcitonin, action of, 131
and calcium metabolism, 687
endogenous, 191
role of, in response to hypercalcemia, 1033
subcellular localization of, 819
Thyroid, anion effect on, 237
cells of, TSH effects on, in filter-well culture, 721
effects of actinomycin D on iodine metabolism in, 424
and estrogen, 849
function of, alterations in, during pneumococcal septicemia, 511
in female rats depleted of body protein, 1023
malignant tumor and, 964
in hypercalcemia, 1033
metabolism of, iodide and, 1
protein metabolism in, cortisone effects on, 1079
respiration of mitochondria of, 28
tissue of, action of TSH on phosphatides of, 591
TSH and proteolysis in particles of, 19
Thyroid gland(s), amino acid accumulation by, 675
importance of, in preventing hypercalcemia, 655
pyridine nucleotides in, 732
thyroidal iodine heterogeneity in, 927
Thyroid hormone(s), alloxan effect on secretion rate of, 828
biosynthesis of, acute effects of TSH on, 921
effects on creatine and kidney transamidinase, 1143
induction of α-GPD by, 1075
liver-blood exchange of, 391
secretion rate of, effect of neonatal administration of testosterone propionate on, 1009
synthesis of, iodide and, 667
Thyroid lobes, radioiodine metabolism of, radioautographic studies on site of, 469
Thyroid tissue, effects of LATS and TSH on metabolism of, 949
Thyroidectomy, acidophils and GH concentration following, 1053
and catecholamines, 554
corticotrophs after, 808
Thyrotropin, role of ouabain-sensitive ATPase in stimulating effect of, 801
Thyroxine, metabolism of, 1109
role of, in response to hypercalcemia, 1033
stimulation of amino acid incorporation into mitochondria by, 81
L-Thyroxine, peripheral deiodination of, as index of TSH blocking, 248
L-Thyroxine-^{131}I metabolism, effect of 5,5 diphenylhydantoin on, 106
Tolbutamide effect on plasma insulin, glucose and corticosteroid levels in rhesus monkey, 207
Transamidinase and adrenal hormones, 1143
TRF, *in vivo* assay for, 229
TSH, action of, on thyroid tissue phosphatides, 591
acute effects of, 921
blocking effect of, T_4 deiodination and, 248
effect of, on ATP concentration, 732
on thyroid cells in filter-well culture, 721
on thyroidal metabolism, 949
excess iodide effect on, 138
in thyroid particles, 19
Tumor(s), GH-producing, hepatic effects of, 865
malignant, effect on T_4 metabolism and thyroid function, 964
pituitary, melanocyte-stimulating activity in, 97
thyrotropic, T_3* from T_4* by, 43
transplanted pituitary, hormonal properties of, 1149
Tyrosine, ascorbic acid role in rats fed with, 1157

Utero-ovarian relationships in pseudopregnancy, 119
Uterus, glucose metabolism in, 1069

Vaginal-cervical vibration for induction of pseudopregnancy, 440
Vasopressin, ACTH in absence of, 1058
and ACTH release, 328
stimulation of GH secretion by, in rhesus monkey, 1016
vasomotor activity of, in anterior pituitary, 341
Vitamin D and electrolyte transport, 773

Weight, uterine, effect of temperature on response to estrone and estradiol of, 466

X-irradiation effects on antibody formation to NIH-LH, 643
